This article describes Phytochemical Analysis and Antioxidant Activity of Extracts from *Berchemia zeyheri*. The article is well-written, but some points need to be thoroughly revised to be considered for publication. The following are some comments to be considered:

1. The title... *Berchemia zeyheri* should be written in italics.
2. The keywords should be written in alphabetical order.
3. Introduction--Please insert a small paragraph about the medicinal plants, considering the recent citations as follows: <https://doi.org/10.1021/acsomega.3c06614>, <https://doi.org/10.1002/cbdv.202200755>, <https://doi.org/10.3390/ph15101202>
4. Discussion part... the authors should correlate the reported active components with the assessed biological activities.
5. Conclusion part: It is important to mention the limitations and the future perspectives regarding this study.
6. Some grammatical errors should be corrected throughout the whole manuscript.
