Potential competing interests: No potential competing interests to declare.

Please specify what are the Pentavalent<sup>2</sup> and Pentavalent<sup>3</sup> vaccines. In the introduction section you list a number of studies similar to yours. Usually these studies are listed to the discussion section. It is important do give more details about the elements of the questionnaire used in this study.

The age categories are not correct. The ranges are too wide. It is not correct to include the mothers aged 15-20 old in the same category with those aged 25-30. There are huge socio demographic differences that influence the results.
