Review of: "A Review of Transformation and Digital Literacy for the Sustainable Development in the Greater Mekong Subregion – Working Paper"

María Napal[1]

1 Universidad Pública de Navarra

This paper describes in depth the concept of Digital Literacy according to different framewoks. However, there is no description of the method followed for conducting the literature review. Likewise, according to the abstract, one would expect that Digital Competence, or Digital Intelligence (DQ) are discussed in relation to the development of the region, but this does not happen. In summary, it's a promising start but it would need further development.
