Thromboxane B2

National Cancer Institute

Source

National Cancer Institute. *Thromboxane B2*. NCI Thesaurus. Code C107560.

An eicosanoid and biologically inactive metabolite of thromboxane A2. Thromboxane B2 is released during anaphylaxis. As thromboxane A2 has a short half-life, the levels of thromboxane B2 can be used to indirectly measure the production of thromboxane A2
