Review of: "Application of Data Mining Combined with K-means Clustering Algorithm in Enterprises' Risk Audit"

Sowmya H K

1. Authors have given a good introduction and literature review to data mining in enterprise risk audit. Kindly include recently published papers (2022 and 2023) in your literature.

2. Methodology is well described, but kindly justify how the combination of the K-means clustering algorithm improves the accuracy.

3. Paper can be accepted with corrections mentioned above.
