Potential competing interests: No potential competing interests to declare.

Published literature and data on severe dyslipidemia among secondary school students in Africa, including Nigeria are rare. I recommend publishing this article after making this correction:

- line 7 in the introduction section (CVD abbreviation is written for the first time so please mention that is the abbreviation of cardiovascular diseases).
- the overall grammar in this article needs to be revised again.
- the p-value suggested to be in **bold**.
