Potential competing interests: No potential competing interests to declare.

Thank you for choosing me to revise this manuscript. This article is very interesting and the results are very instructive. However, in order to improve the paper, some corrections are necessary.

In the methodology section, I suggest that the authors clearly describe the types of analysis they carried out. Furthermore, I suggest that the authors improve the discussion by going beyond the results found and taking into account the socio-cultural context of the country.

Finally, I suggest that the authors add the article's limitations.
