Potential competing interests: No potential competing interests to declare.

The manuscript offers a comprehensive exploration of the relationship between time, consciousness, and free will, drawing on insights from Chinese philosophy, particularly the Yijing, and modern scientific theories such as quantum physics and the theory of relativity. Here are some points of review, highlighting contributions, potential issues, and suggestions for revision:

Contributions:

- 1. Interdisciplinary Approach:** The paper successfully integrates concepts from Chinese philosophy with modern scientific perspectives, offering a unique and comprehensive analysis of time and consciousness.
- 2. Innovative Concepts:** The introduction of the Co-Occurrence Time Model and the detailed discussion on the interaction between linear and cyclical conceptions of time are notable contributions.
- 3. Cultural Integration:** The paper effectively bridges Eastern philosophical concepts with Western scientific ideas, enriching the understanding of time and consciousness.

Revised Potential Issues:

- 1. Complexity and Clarity:** The complexity of the manuscript might be challenging for readers unfamiliar with both Chinese philosophy and quantum physics. Simplifying explanations or providing more background could help.
- 2. Contemporary Relevance:** The paper could elaborate more on the contemporary relevance of its findings. How do these ancient concepts and new interpretations resonate with or impact modern societal or ethical contexts?
- 3. Global Echo:** It would be beneficial to discuss how these ideas resonate with or contrast against current global philosophical trends or debates.

Revised Suggestions for Revision:

- 1. Clarify Key Concepts:** Include a glossary and simplify core concepts for a broader audience.
- 2. Expand on Contemporary Relevance:** Elaborate on how the findings relate to and impact current issues or debates in philosophy, science, or society.
- 3. Enhance Global Contextualization:** Discuss how these ideas compare with or differ from current global philosophical trends.
- 4. Focus on Core Themes:** Narrow the focus to allow for more in-depth analysis.
- 5. Comparative Analysis:** Strengthen the analysis between Eastern and Western perspectives.

I believe that these changes would enhance the manuscript's appeal and significance in contemporary discussions and global philosophical contexts.
