Potential competing interests: No potential competing interests to declare.

1. In graphs 1, 2, 3, 4, 5, 6, 7, and 8, mention the X and Y axes clearly with units.
2. Fig. 3 is not clear.
3. Graphs 8, 9, and 10 need more detailed explanations with reasons.
4. Graphs 11, 12, and 13: separately explain, and citations are required.
5. Briefly explain why graph 16&17 needs exact reasons and citations.
6. In sub-title 3.7, the alloy formed ridges and grooves for any other reason.
7. In the Conclusion, which mechanical properties improve? Write the reasons.
8. How much improvement is there in hot extrusion, and what are the improvements?
9. Check the English in the entire article for corrections.
