Potential competing interests: No potential competing interests to declare.

A very good paper

Observation

1. In the questionnaire, there is a section that reads "What is menstruation, and why does it occur"? The sample size is 50,000, and for students to write what they understand by that topic will be voluminous. I suggest the writer should rather ask the students to define menstruation

2. Knowledge gap. The gap in the research work is not clearly stated. What is the gap that needs to be filled by the researcher?

The research work is above average.

Thank you.
