Comments:

This is an interesting work with a good contribution to the field of wind engineering. The paper can be accepted for publication after some modifications:

- 1-Please, highlight in the abstract some significant numerical results mentioned in the results section.
- 2- Please, insert the reference citation before all equations in the text.
- 3-Many references are quite old. Therefore, some recent relevant reference papers can be added.
- 4-The authors' contribution must be highlighted in the introduction section.
- 5-Stability tests must be added.
- 6-Some figures should be improved; for example figure 2, 8, 13...
- 7-The authors should compare the obtained results in a table with the results obtained by other researchers in recent studies
- 8- The conclusion should be improved and numerical results should be added in this section.
