Potential competing interests: The author(s) declared that no potential competing interests exist.

1. Suggest the **title**: "Menstrual pattern in COVID-19 patients"
2. **Result**: No explanation about Table 3 & Table 4
3. Define "without anticoagulant" as Group I dan "with anticoagulan" as Group II. It would be easier to read in the text.

Ex:

Table 7 shows no statistically significant difference between **without anti-coagulation** and **with anti-coagulation** according to Effect of COVID-19 infection on menstrual flow

Table 7 shows no statistically significant difference between **Group I** and **Group II** according to Effect of COVID-19 infection on menstrual flow

4. Is there any data about laboratory finding before and after COVID-19 infection?
