

# Review of: "Conceptualizing Predictive Conceptual Model for Unemployment Rates in the Implementation of Industry 4.0: Exploring Machine Learning Techniques"

Aparna S. Murthy

Potential competing interests: No potential competing interests to declare.

It has improved a lot!! All the issues, starting from the article title, have been addressed.

Although a case study is not used to get a better understanding of the significance of the study, the addition of "Using machine learning algorithms to identify the causal relationships between different factors and unemployment rates in developing countries" is considerably well written. Also, statistical support was needed.
