Otterhound

National Cancer Institute

Source

National Cancer Institute. *Otterhound*. NCI Thesaurus. Code C53908.

The Otterhound is a large rough-coated dog with a shaggy face and bushy eyebrows. Under the long, oily outer coat is a dense wooly undercoat for protection in frigid water. The ears are long and dangling and the tail curves up like a saber. The coat usually comes in grizzle or wheaten with black markings. Like many other pack hounds, the feet are webbed for swimming. Height: 24-26 inches (60-65 cm.) Weight: 66-115 pounds (30-52 kg.)
