# STn-KLH plus Detox Vaccine

National Cancer Institute

## Source

National Cancer Institute. *STn-KLH plus Detox Vaccine*. NCI Thesaurus. Code C2501.

A vaccine comprised of a synthetic Sialyl-Tn antigen linked to the protein carrier, keyhole limpet hemocyanin (KLH), administered with immunostimulant, Detox. Vaccination with STn-KLH plus Detox may elicit an IgG-based anti-STn antibody response and ultimately a cytotoxic T-cell response against STn-expressing cancer cells.
