

Review of: "Impact of risk factor diabetes mellitus on patients with periodontitis"

RAGHUNATHAN JAGANNATHAN

Potential competing interests: The author(s) declared that no potential competing interests exist.

This Narrative review although highlights and details an important topic it needs extensive reworking and tweaking

1. Epidemiology data have to be described
2. Two way relationships between diabetes and periodontitis need attention and explanation
3. Describe important aspects in the pathogenesis of periodontitis in diabetes such as role of microbes, oxidative stress and immune response
4. Describe more in detail about clinical aspects
5. Improve grammar and overall vocabulary
