Dear authors,

Thank you for allowing me to review the paper. However, I recommend the following changes to update the paper.

1. The article requires proofreading to address grammatical errors and types.
2. Significant insights of the study are not reflected in the Abstract. The Abstract is a snapshot of the whole paper. Therefore, significant findings of the study need to be incorporated in the abstract.
3. The methodology of the study needs more attention. Details of data collection should be presented in a table so that readers can understand them at a glance. Moreover, please add a line or two about your data validation process in the methodology section.
4. Overall, the presentation of the paper is not reader-friendly. For example, the presentation of findings is not well articulated for ready comprehension. Conclusion is inconclusive. Readers will fail to understand what the authors attain after conducting the study.
5. I recommend the paper a thorough review considering the readership of the paper.

By implementing these suggestions, the article will become more organized, easier to follow, and more engaging for the readers. Best of luck with the article!
