Potential competing interests: No potential competing interests to declare.

1. Accept the article after, grammatical sentence corrections. Also needs alteration of language/words, e.g., Instead of using “**dynamic respiratory trouble**,” use dynamic respiratory distress. 4.1 first line--- another clinical and imaging discoveries. To my knowledge, these are not discoveries. Many grammatical errors – sometimes have used past tense, sometimes present tense, etc., e.g., **will have normal chest CT findings during the first two days of the acute effects.**
2. Clinical and imaging discoveries
3. As regards to Figure 6, the image is distorted, appeared as if it has been pulled
4. Fig. 7 - wrong labeling: “and the **persistent** was exchanged to the ICU ”---It should be Patient and not persistent
5. Also no need for lateral X-ray, plus its description is poorly written.
