Review of: "Early Childhood Caregiver Practices and Perceptions Regarding Sharenting and its Impact"

Kiran Kanwal¹

1. Aga Khan University, Pakistan

This phenomenon has a huge impact on a child's development, particularly in behaviour and child privacy.--- This line needs to be elaborated; it's too abrupt.

Mention the children's age group in the introduction paragraph.

In Table 1, "Parent" should come under "Status."

Table 2 indicates that the highest percentage is of "Never," 42%, posting on social media. This needs to be explained or touched upon in the discussions too.

Maybe a mention of a longitudinal study where a child expressed distress over his/her parents sharing pictures without consent would be appropriate.
