Herbaspirillum huttiense

National Cancer Institute

Source

National Cancer Institute. *Herbaspirillum huttiense*. NCI Thesaurus. Code C127720.

A species of Gram-negative, motile, spirillum-shaped bacteria in the phylum Proteobacteria that is unable to grow in N₂-free medium and lacks the nitrogen-fixing genes nifH and nifD. *H. huttiense* is oxidase- and catalase-positive, nitrate reduction negative, and able to hydrolyse urea.
