The writing of the manuscript still needs to be strengthened. You can refer to articles in other directions that are closer to find ideas. Overall, there are many areas that still need improvement.

1. Are the 23 samples representative? Can it represent the region?
2. Better logical relationship between indicators are needed to explain the issues you have identified.
3. Writing needs to be more standardized. The introduction, results, and discussion all need to be reorganized. Focus on the issues you need to discover. Then use literature to interpret and answer.
