Potential competing interests: No potential competing interests to declare.

There are opportunities for enhancement in certain sections of the manuscript:

- Clarify the novelty and central focus of the article, elucidating the primary takeaway for the reader.
- Develop a comparative table featuring other researchers' findings. This will enhance the reader's comprehension of each selected topic, such as Viral Isolation and Detection, Serology, and Treatment & Prevention. The author can evaluate and discuss each finding, offering personal interpretations or comments on each topic.
