The paper contains interesting comments and in my opinion it is a valuable short note. I would suggest further redrafting the text. First of all, there are two forms: "we think" (plural) and "I will first try" (singular) - - this should be unified. What does "the conference is dedicated" mean? The word "however" is repeated too often. On the first page, I suggest changing "my presentation will present". Please check the paper in this respect.
