Potential competing interests: No potential competing interests to declare.

Authors study determinants of significant imports by EU countries relevant for the COVID-19 pandemic. The article is in general well written, interesting and ambitious. However, revisions still can be performed to enhance the impact of the article:

- (1) The data should be updated.
- (2) Why was the period 2015-2020 studied and not for example 2019-2020. This should be explained.
- (3) Other variables like tariffs, barriers could be included.
