Potential competing interests: No potential competing interests to declare.

Abstract: Clearly mention the investigated traits and abbreviations.

Introduction: Modify few sentences and include more references.

Materials and methods: Clearly explain the data used for calculation and also describe the models used for statistical analysis.

Results and discussions: Discussion is insufficient and should be compared with recent literatures. Foot notes of the tables are wrong and to be corrected. Explain the genetic correlations properly.

Conclusion: Rewrite the conclusion in a precise manner.

References: To be verified and include some missed references

Comment of Reviewer: Major revision should be required
