

Review of: "On-Line Monitoring of Minor Oil Spills in Seawater Using Sediment Microbial Fuel Cells: A Preliminary Study"

Ahmad Shahir Jamaludin

Potential competing interests: No potential competing interests to declare.

Dear Authors,

The study presents promising results that are noteworthy across relevant academic and technological fields. Additionally, many of the comments provided by other reviewers have already addressed key points.

To further enhance the manuscript, I recommend including a flowchart or schematic diagram detailing the experimental processes. This visual addition would help readers better understand and relate to your study, particularly as the complexity of the work increases. It is anticipated that with these improvements, the research community will greatly benefit from your findings.

I look forward to seeing the continued development of your work and wish you success in your future endeavors.

Best regards,
