## Dear Authors,

You have addressed very genuine issue regarding the Chinhoyi Caves Heritage sites, Zimbabwe. Findings of your study will be supportive in formulating tourist related rules and regulation for the heritage site. You can further enhance the manuscript by incorporating these mentioned suggestions.

1. Attaching the list of questions asked during the interview, will assist the readers in better understanding of the research.
2. You can amend the abstract by adding few more findings of the study, it will increase excellence of the paper, as readers find concluded findings at the top.
3. "Chinhoyi Caves Heritage Sites" should also part of the keywords.
4. Citations given in the text and their complete reference needs to be rechecked to eliminate few errors present there.
5. The first paragraphs written in 5. Results and Discussion, seems part of methodology; it will be better if it is relocated to its place or remove from here.
6. Adding an estimated number of visitors visiting on (daily, weekly, monthly, or yearly) bases to the study area would be better.
7. Map of the study area is missing in this paper. It should be placed in the research method section.
8. It would be better if some of the findings are visualized in form of tables or graphs.
9. You can also compare your results with the results of similar research if conducted at any other similar part of the world in the discussion part.
10. At the end of paper please give some suggestion/recommendations to the local authority/ stakeholder of the heritage sites accordingly to your research findings.

Best of luck.
