# Dose Length Product

National Cancer Institute

## Source

National Cancer Institute. *Dose Length Product*. NCI Thesaurus. Code C101137.

The product of the number of computed tomography (CT) scans multiplied by the scan width (i.e., total scan length). This value is an indicator of the integrated radiation dose of a specific CT scan. This is expressed in the SI units milligray x centimeters (mGy x cm).

DLP is CT DIvol x slice thickness x # of slices.
