Review of: "Study of the Problems of Determining Public Opinion of the Israeli-Palestinian War in Social Networks"

Seema Rani

1. What specific research questions does the paper aim to answer regarding the use of neural networks for determining public opinion on the Israeli-Palestinian conflict?

2. Can you elaborate on the specific methods of sentiment analysis and vote weighting used in the study? How were these methods implemented and validated?

3. What criteria were used to select the Reddit comments analyzed in the study? How was the data collected, and what were the challenges faced during data collection?

4. What were the key findings of the research? How do these findings demonstrate the potential usefulness of sentiment analysis and vote weighting for marketing strategies, reputation management, and decision-making?

5. How can the results of this study be applied in real-world scenarios? Are there specific examples provided in the paper?
