

Review of: "Pros and Cons of Key Escrow Agreements in Cloud"

Lukman Adewale Ajao¹

¹ Federal University of Technology, Minna

Potential competing interests: No potential competing interests to declare.

- The title required rephrasing and modifications
- Abstract: This section required more technical information support
- Introduction: This section required more analytical background of study
- Related works: This section is poorly presented, it required more investigation to show the research trends, gaps and solutions.
- Methodology: More technical information, analytical novelty is required
- The research does not present significant authors' contribution to knowledge, and organization of research is missing
- More recent related works need to be reviewed, and increase the number of citations.
- The conclusion section required improvement
