Potential competing interests: No potential competing interests to declare.

My observations are listed below:

- 1 . The study they made is very important for the safety of Women in a country like India.
2. Alignment in the write up can be in Justified mode, i.e., the right side of all lines should be at the same level, like that of the left side.
3. Interested to know about technical details of Electrical Gloves , specially Voltage grade .
4. The point they have highlighted about the necessity of proper lighting is essential , a good point raised.
5. Brief description on methodology on CPTED, PROMETHEE, permeability (used at the end of Methodology clause) are needed.
6. Please explain in brief about the three areas referred to in the Fig.1(b). and specify the basis.
7. The study is good for publication. My above views may be taken into account.

**Future study** can be made on Lighting level, CCT of lamps, width of the road, population density therein. For above study / Ph.D. work they can contact me.
