

Review of: "Passivation of miniature microwave coplanar waveguides using a thin film fluoropolymer electret"

RAJESH AGARWAL

Potential competing interests: The author(s) declared that no potential competing interests exist.

The author has successfully demonstrated their idea by fabricating the devices. The paper is original and the results match the theme of the journal. The characterization of the fabricated devices covers all the aspects. The concept is clear and through. The paper can be accepted with some modification. The resolution of the figures at some places are not good. The author also needs to include some recent references in the field of MIS.
