**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The manuscript is poorly written with numerous typos and grammar mistakes. It is very hard to understand what the authors mean by the title. Here are my major concerns:

1. It is hard to do a meaningful review before the authors fix the language and resubmit.
2. Also, pay attention to the terms used, and try to avoid using non-scientific and non-medical terms .
3. Organize the content for a better flow.
4. Get help from someone who has published scientific/medical articles before.
