This paper needs significant modifications. The paper's aim needs to be clarified, the methodology needs to be better developed, the literature review needs to be more comprehensive, and the results must be clearly presented. I suggest the author take some time to plan properly for the direction of the paper. The specific comments are below:

1. The title should be shorter.
2. The abstract is too general. There are no objectives, methods, results, main findings, or conclusions.
3. Ask a problem-Introduction. It does not include a comprehensive literature review, objectives, aim, or study gaps.
4. Research Methods- The method that was applied in this study needs to be clarified. What do you mean by a community-based approach? Is there any quantitative analysis done for this study? How were the extreme weather events analyzed using a questionnaire? 80 household questionnaires out of how many households?
5. Results and Discussion- Table 3.1 is meaningless. How were the results in Table 3.2 obtained from the surveys? What are the numbers indicated in Table 3.3? What is the difference between T and K? How was the evaluation done? On what basis are the performance criteria made?
6. Conclusion-What is Agricultural 4.0?
7. Reference- The number of references must be revised and updated; few references indicate no in-depth discussion in the paper.
