

# Review of: "Mobile Phone Recycling and Stockpiling Behaviour in the UAE: A Gender and Age Study"

Janki Bartwal

**Potential competing interests:** No potential competing interests to declare.

First of all, I would like to congratulate the author for his research work.

Methodology section can be more refined. Though it is mention in abstract that the data was collected in an online survey, the same is not written in methodology. Also, it would be better if the researcher can explain through which online media they collected the data, e.g., facebook, whatsapp, sending email, etc. and to whom (sociodemographic profile, besides age and gender).

In results section, entire text is written which is depicted in tabular form also. The same data is presented both in tabular and figure form. To the best of my knowledge, entire repetition of results in text and tables are not preferred. Also, for a given data, either a table or figure should be mentioned and not both.

References – more and upto date need to be added.
