Review of: "Leveraging Fine-Tuned Large Language Models in Bioinformatics: A Research Perspective"

Celestine Iwendi[1]

1 Institute of Electrical and Electronics Engineers (IEEE)

Potential competing interests: No potential competing interests to declare.

The following should be noted and corrected accordingly:

1. How practicable is your proposed model in real-time?

2. Is it cost-efficient?

3. Grammar requires minor re-editing

4. What are the limitations of the study?

5. The Introduction should contain the organization of the study

6. What are the main contributions of the study?

7. Each section should be properly numbered for better organization

8. What is the future scope of the study?

9. Consider the following related papers
