I read the manuscript titled "Treading the Thin Line Between Health Ethics and Patient Care in the Application of Telemedicine: The Case of Sound Ethical Guidelines in Telemedicine in Sub-Saharan Africa".

I suggest some tips to improve the quality of the manuscript.

- 1- Use pictures and diagrams to convey concepts.
- 2- Specify the type of study.
- 3- You mentioned the scientific databases that you used in the study in the first introduction.
- 4- Specify the time range of the articles you used, from what year to what year.

Good luck
