

Review of: "Sustaining Gender Parity in Corporate Leadership Roles by Means of Random Selection"

Asma Bouzouitina

Potential competing interests: No potential competing interests to declare.

The article explores the effect of random selection of qualified applicants to hold leadership roles and minimize any type of bias. The subject matter is interesting; however, the manuscript does not match the traditional requirements of academic writing:

- The abstract does not state the sample
- There are no keywords
- The introduction is very short and does not include recent references
- The theoretical framework and the hypotheses are absent
