Potential competing interests: No potential competing interests to declare.

After I passed through the manuscript, the following comments will improve the quality of the manuscript

1. The references is outdated and new references are required to be included in the literature
2. The objectives should be separated from the problem statement
3. The methodology should be separated from the discussion
4. The results and discussion should be presented under one heading
5. The conclusions should be separated from the recommendations for future studies
