Potential competing interests: No potential competing interests to declare.

I recommend reconsideration of the manuscript after major revision. Furthermore, fundamental correction of written English is obligatory.

1. The title has many unnecessary words; please reconsider.
2. How did you select the genes related to this study?
3. Please add the supplier for all the media and machines listed, as well as the models if they are not specified, such as FBS, RPMI, etc.
4. Please explain more how you chose the bee venom and melittin concentrations?
5. Please rewrite the MTT assay!
6. Your results must be rewritten.
