Review of: "Cloud Computing Paradigm in Academics"

Prasad Purnaye[1]

1 MIT-WPU

The authors have presented a review on role of cloud computing in academic. The authors have compared the available cloud platform on different aspects, However, the study clings on to relatively older concepts of cloud migration. The paper discusses challenges in Successful Adoption of Cloud Computing in Educational Institutions. Authors could add the concept of multi-cloud environment. Nevertheless, the paper could be a good read for non-technical institutes to get hang of cloud based service for their institutional modules.
