It is a nicely put-together effort which is highly appreciated. However, there are some typo errors which I am mentioning as follows:

- 1- Inconsistency in period placement (in ref 21 after "reference," and in ref 17 and 26 it's placed twice).
- 2- In ref 35, the cell line name is MCF-7, not just MCF.
- 3- In ref 46 and 66, subscript the IC50 numeric part.
- 4- In ref 74, subscript the LD50 numeric part.

Overall, it's good hard work, just fix these discrepancies. In addition to that, I would suggest that you don't bold the references before the text (i.e., An. Lei et al (2007), etc., and all the rest till the end). Leave only headings bold, since it shifts the attention from the main heading of the section.

Good luck for future work.
