Pulmonary Myxoid Sarcoma with EWSR1-CREB1 Translocation

National Cancer Institute

Source

National Cancer Institute. *Pulmonary Myxoid Sarcoma with EWSR1-CREB1 Translocation*.
NCI Thesaurus. Code C142827.

A sarcoma that arises from the lung. It is related to a bronchus and is often predominantly endobronchial. It is characterized by the proliferation of round and spindle cells within a myxoid stroma. It is associated with the presence of an EWSR1-CREB1 fusion gene.
