Review of: "A Novel Variable Neighborhood Search Approach for Cell Clustering for Spatial Transcriptomics"

Micheal Arowolo[1]

1 University of Missouri

Abstract should discuss results obtained from work done and its significance

Algorithms discussed should show some pseudocodes for the methods e.g PCA
"https://ieeexplore.ieee.org/abstract/document/9077642", K-means

Discuss work done extensively, results obtained and compare with existing works in literature

Make conclusion separate from discussion
