

Review of: "Socio-cultural factors influencing women empowerment: A cross-sectional study among an ex-criminal tribe in West Bengal, India"

Dr Karthik Rajendra

Potential competing interests: No potential competing interests to declare.

The authors have selected a very good topic and have done good analysis. I have few suggestions for the improvement of the paper technically,

- 1.The limitations of the work proposed and their future improved should be given in more detail.
- 2.The Introduction Part information is not enough for base domain knowledge to recent concept explained well.
3. Analysis of Results must be improved. Current chart form is not concluded the results.
- 4.Any specific methods are suggested for implementing this?
- 5.How your proposed system will support current working environment?
- 6.More sufficient references cited for providing a background to the research.
7. Abstract should be description of the problem, can be improved.
8. The paper is generally well written and structured. In several instances I also suggested to cite more relevant and recent literature.
9. Related works is summarized only but the authors did not criticize them. Recommendations to use these methods are not exist. The problems of related work are not clear.
10. The conclusion part can be significantly enhanced. At least the contributions of the paper should be more clearly and explicitly described.
