**Potential competing interests:** No potential competing interests to declare.

I have gone several times through this manuscript and found it is very interesting and easy to read. Topic of this manuscript is interesting, and results are applicable in health sector. This manuscript contains some minor issues such like: Manuscript has not written in justify format. Some sentences of the manuscript are incomplete. So, The English should be checked, and the sentence structure should be simplified, avoiding repetitions whenever possible to make your article be more fluent and logical. Add Appendix before references. Rewrite introduction and conclusion section. Write important results of this article in bullet format in conclusion section. Rewrite references in standard format.
