

Review of: "Establishing a Multidisciplinary Human Resources Development Institute Under Public-Private Partnerships"

Lucas M

Potential competing interests: No potential competing interests to declare.

My Review comments :

Decision: no rejection but could be improved with the following corrections.

1. The abstract could be written with more highlights to convey what the article is all about.
2. The literature review should be very specific.
3. Research Methodology section is not clear and does not sound technically well.
4. The structure of the research needs to be changed to fulfill the standards of Scopus.
5. The multidisciplinary human resources development concepts are not defined properly.
