**Potential competing interests:** No potential competing interests to declare.

1. This article is very interested and I think necessary for preventive make decision , but in this article, the purpose of predicting the death rate of covid-19 is stated, considering that the Covid-19 epidemic is over, it is not possible to predict the death rate because these There are death statistics now. But it is suggested that the authors of the article design and develop a model for predicting the death rate and... for future epidemics with the same method and by examining the data of other epidemics.
2. Determine the influencing and predicting variables in the rate of death and epidemics.
