Lipophilicity

National Cancer Institute

Source

National Cancer Institute. *Lipophilicity*. NCI Thesaurus. Code C18126.

Lipophilicity represents the affinity of a molecule or a moiety for a lipophilic environment. It is commonly measured by its distribution behavior in a biphasic system, either liquid-liquid or solid-liquid, or thin-layer chromatography system. (from Pure Appl. Chem., 70, 1129-1143 (1998))
