

# Review of: "A Simple Preprocessing Method Enhances Machine Learning Application to EEG Data for Differential Diagnosis of Autism"

Dr. Kunjabihari Swain

Potential competing interests: No potential competing interests to declare.

The paper proposes a preprocessing method for the diagnosis of Autism from EEG data.

Following are my comments.

1. Figure 1 can be presented in a table.
2. The resolution of Figure 3 is very poor; please provide a clearer image in the revised manuscript.
3. The resolution of Figure 4 is very poor; better present it in table format.
4. The manuscript needs to be formatted (please use justification instead of left alignment).
5. There are several synonyms used in the manuscript without defining them. Please define the synonyms before using them.
6. Authors need to discuss how the sensitivity, specificity, and overall accuracy are calculated.
7. Improve the resolution of Figure 5 in the revised manuscript.
